

There is a Real Difference

Cream of tartar, derived from grapes, is used in Royal Baking Powder because it is the best and most healthful ingredient known for the purpose.

Phosphate and alum, which are derived from mineral sources, are used in some baking powders, instead of cream of tartar, because they are cheaper.

If you have been induced to use baking powders made from alum or phosphate, use Royal Baking Powder instead. You will be pleased with the results and the difference in the quality of the food.

EMERSON, NEBRASKA.

Wet Nebraska Pays 20% More Taxes Than Dry Kansas!

Furthermore, dry Kansas assesses its property at par while wet Nebraska assesses only one-fifth.

The state tax rate in Nebraska (with saloons) is \$6.80 per \$1,000, according to the last official report—while the tax rate in Kansas (with prohibition) is only \$1.30 per \$1,000.

The charge that prohibition makes taxes higher is not true.

The above report is taken from the best official records of Kansas and Nebraska. These records are open to any thinking person. Read the truth of the prohibition question. The Nebraska Prosperity (for saloons) League dares not face facts.

Nebraska is prosperous in spite of the saloon, and not because of it!

VOTE NEBRASKA DRY!

A. M. CHAMBERS

Walthill, Nebr.

Republican Candidate for the Legislature

Mr. Chambers, in soliciting your support, frankly invites your attention to his record in the last legislature, during the winter of 1915, which has been approved by both Republicans and Democrats who followed closely the records of the session.

By occupation he is a farmer, a pioneer of Thurston County, who keeps well posted on living questions. Always consistently republican, he is not offensively partisan, and he enters no entangling alliances. He believes that a law-maker should be governed by the wishes of the people and what is best for the welfare of all.

He cordially solicits your vote and endorsement.
